
(a) Penalty added to the loss
physically impossible
at 0 W/m² (this study)
at standardised zero
training mean 198.5 W/m²
Penalty term, λ = 0.1
Forecast ŷ (W/m²)
(b) Effect on the loss-minimising forecast
+18.0 W/m² at 0 W/m²
at 0 W/m² (this study)
at standardised zero
Upward bias (W/m²)
Expected irradiance E[y] (W/m²)
